ORIGINAL RESEARCH PAPERS:

1. 4D Flow CMR Consensus Statement

2. A prospective, double-blind, randomised controlled trial of the angiotensin converting enzyme inhibitor Ramipril In Aortic Stenosis (RIAS trial)

3. 4D Flow: Quantification of aorta SNR as a function of field strength and contrast enhancement for 1.5T, 3T and 7T

4. Observational study of regional aortic size referenced to body size: production of a cardiovascular magnetic resonance nomogram

5. A prospective, double-blind, randomised controlled trial of the angiotensin converting enzyme inhibitor Ramipril In Asymptomatic Aortic Stenosis (RIAS trial): Trial Protocol
   Bull S; Loudon M; Francis JM; Joseph J; Gerry S, Karamitsos TD; Prendergast BD; Banning AP; Neubauer S; Myerson SG. J Clin Trials 2014; 4:151-7. doi:10.4172/2167-0870.1000151

6. Myocardial Steatosis and Left Ventricular Contractile Dysfunction in Patients with Severe Aortic Stenosis

7. Aortic dilation in bicuspid aortic valve disease: flow pattern is a major contributor and differs with valve fusion type

8. The prevalence of left atrial appendage thrombus in patients undergoing catheter ablation for atrial fibrillation maintained on Warfarin
   Herring, N; Page, S; Ahmed, M; Burg, M; Hunter, R; Earley, M; Sporton, S; Newton, J; Sabharwal, N; Myerson, S; Bashir, Y; Betts, T; Schilling, R; Rajappan, K. J Atr Fibrillation 2013; 5 (issue 6): 28-35

9. Global and regional left ventricular myocardial deformation measures with magnetic resonance feature tracking in healthy volunteers: comparison with tagging and relevance of gender

10. Human non-contrast T1 values and correlation with histology in diffuse fibrosis.

11. Non-contrast T1 mapping for the diagnosis of cardiac amyloidosis

13. Aortic regurgitation quantification with cardiovascular magnetic resonance: association with clinical outcome

14. LV mass volumes and ejection fraction estimation with magnetic resonance feature tracking: a comparison with traditional short axis LV CMR contouring.

16. Cardiac iron overload in transfusion-dependent patients with myelodysplastic syndromes

17. Growth of Left Ventricular Mass with Military Basic Training in Army Recruits
Batterham AM; Birch KM; Pennell DJ; George KP; Myerson SG. Med Sci Sports Exerc 2011; 43(7): 1295-1300

18. A comparison of visual and quantitative assessment of left ventricular ejection fraction by cardiac magnetic resonance

19. Feasibility and Safety of High-Dose Adenosine Perfusion Cardiovascular Magnetic Resonance Imaging

20. Direct and indirect quantification of mitral regurgitation with cardiovascular magnetic resonance, and the effect of heart rate variability.
Myerson SG, Francis JM, Neubauer S. MAGMA 2010; 23: 243-49

21. Real-time 3D fusion echocardiography

22. Phase contrast ultra-short TE; a more reliable technique for measurement of high velocity turbulent stenotic jets.

23. Magnetic resonance imaging-derived indices for the normalization of left ventricular morphology by body size

24. Artefactual limitations of magnetic resonance imaging in the diagnosis of recoarctation of the aorta
Salam S, Myerson S, Wilson N. Heart 2008;94:753

25. Variation in the lipoprotein lipase gene influences exercise-induced left ventricular growth.

26. BJCA Cardiology Trainees Survey
Myerson SG. Br. J Cardiol 2006; 13: 102

27. Differentiating athletes heart from pathological forms of cardiac hypertrophy by means of geometric indices derived from cardiovascular magnetic resonance

28. Quantification of regurgitant fraction in mitral regurgitation by cardiovascular magnetic resonance: comparison of techniques.

29. 3rd National Survey of Cardiology Trainees in the UK – Results & Comment

30. Novel imaging techniques for the differentiation of a left ventricular mass.
Timperley J, Myerson SG, Mitchell AR. Heart 2004; 90(2): 210

31. Mobile phones in hospitals
Myerson SG, Mitchell AJ BMJ 2003; 326 (7387): 460-1

32. Bradykinin receptor gene variant and human physical performance

33. Cortical bone resorption during exercise is interleukin-6 genotype-dependant.

34. Left ventricular mass measurement : reliability of M-mode and 2-dimensional echocardiographic formulae
35. Automatic MRI adipose tissue mapping using overlapping mosaics
Yang GZ, Myerson S, Chabat F, Pennell DJ, Firmin DN. MAGMA 2002; 14: 39-44

37. Caffeine-containing drinks – a cause of arrhythmias?

38. Left ventricular hypertrophy with exercise and the angiotensin converting enzyme gene I/D polymorphism: a randomised controlled trial with losartan.

39. The bradykinin BK2BR receptor polymorphism and the human left ventricular growth response

Folland J, Leach B, Little T, Hawker K, Myerson S, Montgomery H, Jones, D Experimental Physiology 2000; 85: 575-9

41. The human angiotensin I-converting enzyme gene and endurance performance.

42. Human gene for physical performance.

REVIEWS & INVITED SUBMISSIONS

43. Preoperative assessment and perioperative management of cardiovascular risk
Schiefermueller J, Myerson SG, Handa A, Angiology 2013; 64(2): 146-50

44. Heart valve disease: investigation by cardiovascular magnetic resonance

45. The role of CMR in the evaluation of valve disease
Karamitsos TD, Myerson SG, Progress in Cardiovasc Dis. 2011; 54(3): 276-286

46. Cardiovascular Magnetic Resonance – An update and review

47. Assessment of valvular heart disease by cardiovascular magnetic resonance imaging: a review
Christiansen JP, Karamitsos TD, Myerson SG Heart Lung Circ 2011; 20: 73-82

Christiansen JP, Karamitsos TD, Myerson SG, Francis JM, Neubauer S. Heart Lung Circ 2010; 19: 697-705

49. Who should perform cardiac imaging?
Myerson SG Cardiology Management 2011

50. Investigations in valvular Heart Disease
D’Arcy J, Myerson SG Clinical Medicine 2010; 10 (2): 172-6

51. The role of cardiovascular magnetic resonance imaging in heart failure

52. Valvular and haemodynamic assessment with cardiovascular magnetic resonance
Myerson SG. Heart Fail Clinics 2009; 5(3): 389-400

53. Can cardiac magnetic resonance imaging reclassify uremic cardiomyopathy in patients with end-stage renal failure?

54. Evaluation and management of the cardiac amyloidosis
55. How Do We Produce Quality Cardiologists?
Myerson SG. Cardiology News 2007 Nov/Dec

56. What is the role of balloon dilatation for severe aortic stenosis during pregnancy?
Myerson SG, Mitchell ARJ, Ormerod OJM, Banning AP. J Heart Valve Dis 2005; 14: 147-150

57. Exploring Cardiac Horizons
Greenwood J, Myerson SG. Br J Cardiol 2005; 12: 24-25

58. The assessment of left ventricular mass by cardiac magnetic resonance
Myerson SG, Bellenger NG, Pennell DJ. Hypertension 2002; 39: 750-755

CASE REPORTS

59. Partial atrioventricular septal defect presenting in a septuagenarian
Zheng SL, Myerson SG, Orchard E. E Heart J (in press)

60. Innominate artery pleomorphic sarcoma imaged with cardiovascular magnetic resonance and Positron Emission Tomography-Computed Tomography
Davis AE; Boardman H; Trent S; Petrou M; Myerson SG. Eur Heart J 2015 doi: 10.1093/eurheartj/ehv098

62. Absent Right Superior Vena Cava: Multi-modality Imaging Of Upper Body Venous Drainage Via Left-sided Superior Vena Cava and Azygos Venous System

63. Tamponade caused by cardiac lipomatous hypertrophy
75. Intercostal artery aneurysm post-coarctation repair diagnosed by magnetic resonance angiography. 

76. 3,4-methylenedioxymethamphetamine (MDMA or ‘ecstasy’) causing severe hypoglycaemia.
